

Introduction to Topic 1:

Subject Access in Research Data Management

Monica Lassi & Maria Johnson

Lund University Library

Challenges

- Providing high quality metadata
 - Time, competence, support
- Choosing a good controlled vocabulary
 - Discipline specific vs general
 - Depends on the infrastructure or repository – scope, target groups
- Interoperability

Today's workshop theme

- Applications of subject access in research data management
 - Two presentations: from bioinformatics and the humanities
- Discussion topic for the end of the workshop:
 - How can we work towards establishment of best practices and guidelines?
